Hi There

I am writing to you express my feelings of the changes of all these state forest to proposed national parks and the affects it will have on me

I have grown up all my life spending most weekends within these state forest's and these changes will have a massive change on my recreational activities and life doing what I love

My hobbies include recreational four wheel driving dirt bike riding and general camping and being in the great outdoors with my family and pet dog

It seems that all of the proposed changes that are currently trying to put forward to change these great state forests to national parks will stop me doing of the above

I know 99% of visitors to these area's do the right things to protect these area's for the future but there is always a small number of people that disregard the law

Locking everyone out of the bush will not stop these people doing the wrong things as they will just go there anyways and disregard the law still.

I think a stronger presence of rangers and authority would be the best solution to looking after these area's to teach the small minority of people that do the wrong thing to obey the laws set in place currently

Is there any upcoming meetings that I can attend to express my feelings of these changes in person?

This is something I would really like not to see happen so my children and family can still enjoy these great area's the same way we always have

Thanks for your time

Kind Regards,
