Hi,

I just want to say that I agree with the proposal.

It is a reasonable one in that the areas closer to major townships are still left as State Forests or State Parks with the option of people who live in the 'bush' being able to take their animals on the leash for walks i.e. dogs.

For those people who are more remotely situated within the National Park demarcation – perhaps some negotiation needs to occur so that they are not disadvantaged from taking their dogs for a walk in the park on leash of course. This might prove to be a difficult one!

I agree totally that our Wombat State Forest needs to be further protected from proposed mining, logging and clear felling which endangers our various species that rely on this natural habitat for their existence. More and more there are encroachments and pressures put upon natural bush and forests by governments and individuals to make a 'quick buck' at the expense of our heritage.

All up it is a timely proposal and I wish you the best in making Wombat State Forest a designated National Park with sections of State Park.

Kind regards,
Vanessa Craven
