From: belinda-lee leishman-johns <  
To: veac@delwp.vic.gov.au,

Why can't u bloody do gooders leave our forests alone, your so called bull shit will do damage not preserve, I live in the Wombat state forest and spend my nights driving to work constantly pulling over to help our wildlife, the way I see it I paid to live here and will not be stopped by u idiots if I want to go walking etc, stopping us getting firewood which is also helping keeping the risks of fires down by keeping over growth down etc your going to make the situation worst, u do gooders sit in your little office not seeing the real world for how it truly is, we've been told our insurance etc will go up and I blame u as your so called proposals r only going to damage what beauty we have, look at the California fires atm similar will happen here you r going to make this a fire ball of trouble, r u idiots going to go in and control the under growth mmm I think not, as for most of us here living up on our mountain we as well as the CFA have helped maintain the undergrowth etc so we can look forward to our Summer's with little dread of a fire, but now we might as well all sell up u r now putting a big community in high danger, u have no ideal how angry we all r, our forest is our home for us to enjoy our walks, take our children camping out doors near our little rivers, my son enjoying his motorbike riding, gold prospecting, seriously Hitler might as well take over our country, do I sound happy NO,
