## Submission for the investigation "Central West Investigation"

Submitted on **18-10-2018**

Information provided by the author:

Title: **Mr**

First Name: **Linton**

Last Name: **Corbet**

Description:

Dear Investigators, This submission is in full support for the recommendations of the team and, in particular, for the creation of a Wombat-Lerderderg National Park. The aims to permanently protect the natural environment and natural biodiversity along with underlying ecological structure and supporting environmental processes; to protect the rights and interests of Traditional Owners, native title holders and Aboriginal Victorians, and their cultural values; to protect historic sites and values; to provide for ecologically sustainable scientific, educational, inspirational, recreational and visitor opportunities consistent with conserving those values are exactly what we need in this age of the ever-expanding ever-encroaching urban environment. The activities permitted and excluded are well designed to meet these aims in the long term. Any relaxations in the activities recommended would hinder protection and conservation of this forest's natural environment and natural biodiversity along with underlying ecological structure. Thanks for the opportunity and best wishes for getting the recommendations adopted. Please also be critical when evaluating submissions that inaccurately or misleadingly interpret the findings/recommendations. Sincerely, Linton Corbet.
