Submission for the investigation "Central West Investigation"

Submitted on **22-11-2018**

Information provided by the author:

Title: **Mrs**

First Name: **Dominique**

Last Name: **Richardson**

Description:

My concern is that with so many different types of parks (bushland, conservation, regional and nature) it will complicate management of them. It is concerning that there are limitations to hunting as it useful for controlling wild animal populations in these areas. As a dog owner, further restricting the camping areas where dogs are allowed ,limits my options for getting out into the Australian bush. I can never understand why it is preferable to have wild animal populations out of control in these parks like deer and pigs are, and yet the public can't take their dogs on leashes, when they aren't doing any harm being on the same walking tracks as humans. I support having more state forest available for multi use recreational use, more nature reserves to protect flora and fauna .
