To the Victorian Environment Assessment Council,

I feel desperate about the loss of parks, the decimation caused by poor park maintenance, the insufficient funds into park management and pest control.

You've come back to power with a strong majority and for that I am VERY grateful. Please put the environment and national parks on your priority list and protect species from extinction.

You have the power to do so much good now.

Please look after the native voices that are falling silent under constant habitat decimation.

We will NEVER GET THEM BACK!!!

Please help!!

Yours sincerely,

Catherine Young
