06/11/16

Dear Sir/Madam,

I want to make a submission to the state wide Assessment of Public Land Discussion Paper for public comment August 2016.

The first issue that I want to bring up is, that public land never be used for uranium mining and uranium exploration. The price of uranium makes it unviable, the problem with waste, water, wash fines.

The second issue that I want to bring up is, that public land is reserved for future roads and train services. So no houses can be acquired. So we avoid confrontations such as east-west link, sky rail and last week the death of the squatter in Wendigo st.

The third issue that I want to bring up is, That public land should be reserved for hospitals and nursing homes as the population reaches in excess of 6-9 million people.

yours sincerely

N Pastalatzis
